ABOUT PROGRAMME

The role of Technical Education has changed over the years from its initial role of providing quality technical education to its current role of delivery candidates suited for the industry. This was long standing demand of the industry to the academic world. Various surveys show that 80 % of candidates delivered by Technical Institutions are not directly employable. They need to be trained to suit the requirements of the industries and the industries play a major role in preparing the students. The industry can offer valuable inputs to the technical institutions in the form of research grants, sponsored projects, training programmes etc. Therefore a concentrated effort to bring together the technical institutions and the industry is necessary. It is in this context that the ISTE Annual State Convention has adopted the theme **“SHAPING TECHNICAL EDUCATION TO MEET THE CHALLENGES BEYOND 2020”**.
