

About the Institute

Government Polytechnic was established in the year 1954, prior to establishment of Gujarat state. Initially the Institute was started with three Diploma Programs in Civil Engineering, Mechanical Engineering and Electrical Engineering with a total intake capacity of 165 seats.

Today the Institute is recognized as a one of the oldest and premier polytechnic in Gujarat State and as a Centre of Excellence in the field of Electrical Engineering. Over the years there has been dynamic progress at G.P. Ahmedabad in all academic and parallel improvement in facilities and infrastructure to keep it at par with best institutes. The Institute is on the way of excellence and grows with time. This institute has always taken a lead role for extra curricular activities apart from teaching. The institute has also taken lead role for organizing training programs for faculty members innovative of its type.

About the Program

Civil Engineering Department of the institute has planned and proposed to come up once again with a training program based on Port Engineering and Management. The program

is designed for one week. The program is based to educate the faculties related to the recent developments at Ports, Material Handling aspects at Ports (Engineering and Managerial), Financial (raising funds) which are utmost important for teaching, consultancy as well as would educate them with latest technologies and innovations. The program would be beneficial to the research oriented faculty and would also provide aid for new technologies and innovations.

Gujarat has been in the news for the development of the Port sector. With the new upcoming ports in the state, it is the need of the day to educate the faculties and the students related to the developments and to cope up with the needs of the industry of HR some background in port engineering and management. This topic of Port Engineering and Management has been introduced in the syllabus of UG and PG students looking to future potential of Port sector. The emphasis of the program would be more on this aspect. The professionals of Essar, Adani PMC, ABG shipyard, GMB and Pipavav Port will conduct this training program. The speakers of the program are having vast experience. This training will add to the value of the faculty

members and will also aid and equip them with recent technologies and innovations. The topics to be covered during the program are mentioned here as under:

- Port Planning
- Navigational Aspects
- SBM
- Traffic Management
- Logistics related to clearing, forwarding, power and water supply
- Port Connectivity
- Material Handling
- Financing the Project
- Environmental Aspects
- HR management
- DM for Ports
