Third Announcement

One Day State Level Workshop

On

“Environmental Issues and Challenges in perspective of Urban Development”

(EICUD-2010)

23rd December, 2010

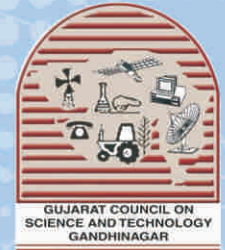

(10:00 am to 6:00 pm)

Organised by:

Vadodara Institute of Engineering
Kotambi

Supported by

Gujarat Council on
Science & Technology
Gandhinagar

About the Institute

Vadodara Institute of Engineering was established in June 2009 with a mission to create a challenging learning environment within and beyond the classroom that encourages students' development with their active and creative minds ensuring valuable assets to the nation. The institute is affiliated to Gujarat Technological University (GTU), Ahmedabad. The institute is located in incredible pleasant and peaceful environment, 19 km away from Vadodara Railway Station and 15 km away from Vadodara Airport. Institute holds in its lap state of art well equipped laboratories, well stocked rich library, ultra modern equipped computer centre, unique class rooms and other facilities to support the learning process of the students.

Objective & Coverage

As we need economical growth, we constantly strive for urban development and rapid industrialization. We have no way to accept that unplanned urban development in many cities across the globe has led into adverse results in context to environmental balance. It is hard fact that in a human race to ensure so called development, the quality of environment is manipulated and deteriorated at alarming levels. As a result of our unplanned actions, we knowingly welcome consequences due to climate change and global warming. Hence, it is of utmost importance to address how to promote urban development projects that may cause minimum negative environmental

impacts. With this objective, Vadodara Institute of Engineering has planned to organize One Day State Level Workshop on "Environmental Issues and Challenges in perspective of Urban Development (EICPUD-2010)" under active support of Gujarat Council On Science & Technology (GUJCOST), Gandhinagar on 23rd December, 2010. This Workshop will provide a common platform to interact researchers, experts & technocrats from industry and academia through brain storming sessions on environmental concerns in regards to our efforts for ensuring sustainable urban development. These sessions will be focusing on following themes.

Contents of the Workshop

- Sustainable cities - Land use and Urban form, Preservation of urban green space
- Green building and Energy utilization
- Transportation planning and traffic management – Flyover, BRTS & Other initiatives
- Waste management and Resource conservation

Who can register?

All faculty members who belong to Civil Engineering, Environmental Engineering and other concerned disciplines in Engineering colleges & Polytechnics as well as all persons who work in concerned areas (relevant to theme) in the industry or research organizations can register to participate in the Workshop. The selection of eligible applicants will be made on "First Come First Serve" basis.

How to register?

Application duly filled in the prescribed format along with a Demand Draft of applicable registration fees drawn in favour of Vadodara Institute of Engineering (payable at Vadodara) should be sent to the Institute on or before due date. Interested candidates may also pay the registration fees in cash before due date.
