About *Genius* GROUP OF INSTITUTIONS

Genius Group of Institutions has been established with an endeavor to drive the future citizens to achieve goals. Since its inception it has built up a reputation for academic excellence. However, we regard 'excellence' as a constant journey, not a point of culmination. We carry on with our journey... towards excellence. Our deep involvement for enriching the knowledge of students and enhancing the quality of education is a constant endeavor.

It all began with the toil of one enterprising individual, **Mr. D. V. Mehta** when he ventured on his own to create history in the field of education by implementing successfully the concept of global learning. This journey characterized by ups and downs, reached a milestone today.

With great powers comes great responsibility, this adage is our favorite line indeed for it succinctly puts across what educational institutions ought to do. And for an educational institution as mighty as *Genius* Group, some serious responsibility lies on the shoulders for we not just mould careers but lives of individuals. As we strongly believe in **BUILDING GLOBAL CITIZENS...** By Building Global Knowledge Capital.

With every passing day, responsibilities, expectations and demand has been increasing multifold and so has been our performance. Every single academic year, we have been making stupendous commencements both in results and introduction of new course. Thus pushing the envelope beyond our own imaginations, we have reached a phase, where the greatest challenge is ourselves and each time, we just want to get better.

The posterity would always look up to its lineage, not just the success, attitude and hard work involved to see the aspired results but also most importantly the journey that made it happen. And a beautiful journey means a strong thought. Today, *Genius* Group is proud to claim responsibility for being the reason behind a revolution for the generation. We help to transform all those ideas into thoughts and later into actions. A strong thought always stands the test of time and hence brings the best of that generation. And we strongly believe, wherever we may go, whatever generation may come and go, it's the strong will and thought, which makes the true difference. And we are sure no milestone is really far off, if a team sincerely follows a strong ideology.

Genius Group is a unique group of institutions offering K.G. to P.G. level education with the sole purpose of providing cutting edge syllabi, which has the affiliation with **State board, CBSE board** as well as **Cambridge board** and which covers many different professional courses under its roof.

Synapse of the Group is shown below :

About RAJKOT CITY

Rajkot is the 4th largest city in the state of Gujarat, India. It is the 28th urban agglomeration in India, with a population more than 1.60 million. Rajkot is ranked 22nd in the world's fastest growing cities and urban areas from 2006 to 2020.

Economy

The city contributes to the economy of the state with heavy and small scale industries under the patronage of Gujarat Industrial Development Corporation (GIDC) and Gujarat State Financial Corporation (GSFC). The economy of Rajkot got another shot in the arm with 28 crore World Bank aid for development of infrastructure of the city. Many renowned business houses made a beeline for grabbing the property market in the city, before it skyrockets. The plans are already in place to beautify and modernize the ancient city, including a Rock Garden, Ala Chandigarh. Another 25 crore project to rebuild the Kaiser-e-Hind, the only major bridge linking to the city, is already nearing completion. All such infrastructure development will add to the economic wealth and promote the local business houses.

Industry

Rajkot is well known throughout the world for its casting and forging industries. Over the last few years, it has started to play an increasingly important role in the complex supply chains of many global engineering companies that make products such as electric motors, automobiles, machine tools, bearings, etc. Rajkot is most famous for mechanical industry especially in Shapar nearby Rajkot.

In the near future, the government of Gujarat will allocate large land areas for the development of Special Economic Zone which will be parted in three different areas and will include industries such as Software, Auto-Mobiles, etc. As per recent market reviews, Rajkot is becoming Asia's biggest Auto-Mobile Zone.

Glimpses of GARDI-Genius MIND FIESTA-2011

We have evolved splendidly in our journey of a decade and the milestone of the journey was – Gardi-Genius Mind Fiesta-2011. It was a remarkable event conducted by the Genius Group of Institutions. It was inaugurated by Hon. Shri Dipchandbhai Gardi, a visionary leader and a well-known philanthropist who is our source of inspiration too. We were honored by the esteemed presence of eminent personalities and honorable citizens of India and foreign dignitaries.

Experts like Dr. Abhas Mitra, Mr. Punyaprasun Bajpai, Dr. Pradip Shrivastav, Mr. Ram Mohanji, Mr. Philip Job, to name just a few of them conducted sessions on different subjects. It proved to be open floodgates to the latest knowledge held by experts in their respective field.

Excellent mix of project display with a variety of formats, thoughtful and informative plenary presentations and a stimulating mix of people attended this mega event.

More than 5000 members including students and staff worked united and untiringly to make the event a trend setter in Rajkot. The display included projects, models, presentations, etc. of different areas like,

- Designing
- Arts and Craft
- Mathematics
- Science & Technology
- Marketing and Advertising
- Astronomy - Space Science
- Robotics
- Sports
- Film and Television
- Electronics & Communication
- Aviation
- Journalism and Mass communication
- And our little champs as Master Blasters

Around 80,000 to 1,00,000 students and visitors took the benefit of the unique event including,

- Teachers and lecturers
- School and college students
- Industrialists
- Key opinion leaders
- Press and media people
- NGO's and social activists
- Bureaucrats
- Celebrities from sports and film industries, etc.

Hence once again, we intend to further raise the standard with the grand exhibit The Gardi-Genius Youth Fiesta-2012 following the footprints of our last year's success towards benchmarking the forthcoming mega event.

Highlights Of Gardi-Genius Youth Fiesta-2012

A grand exhibition of knowledge & intelligence that falls generally in the month of January each year. It links together different knowledge networks and reinforces the significance of innovation, interaction, information, communication & technology in the 21st century, through the agencies of panel discussions, lectures, workshops, exhibitions and exciting competitive events. It serves as a meeting place for creative minds to discuss their ideas and allow for testing of their ideas in the face of intense competition, rigorous evaluations and a touch of the carnival.

The expo is designed to inspire solutions in which technology, culture, humanitarianism, and viability symbiotically coexist. This expo attempts to inspire creativity within the restrictions that are inevitable in any development.

These activities are organized by holding sensitizing orientation session before any interaction and the learning experiences that they have had.

Towards accomplishing our aim, this activity conducts relevant lectures, workshops, seminars and monthly online programming contests – a thermometer for the coding fever. Through this wholesome recipe, it provides the student with solid algorithmic and programming foundation as such that will help them to empower their strengths for entering into the corporate field and in world renowned programming contests.

Dedication, commitment, determination, courage has proved to be the source of inspiration to youth in accomplishing their desired goals.

Youth Fiesta creates a platform for technologists to harmonize with media and design in technology contexts. It is thus an invitation to artist and designers to experiment with technology.

Come and inspire the future of tomorrow...
