About the Seminar

The language of an image is universal. Images were means of communicating information in ancient days. Even today, although people from different parts of the world speak in different languages, an image conveys almost the same universal meaning to all. With the rapid development of modern computer technologies and with the increasing attempt in getting information at ones fingertips, the importance of communication of information using images cannot be ignored.

The fields of digital image processing and computer vision are fast growing. The seminar is going to deal on the recent applications in Image Processing, the role of Computational Intelligence in Image Processing and Digital Steganography.
