

# L.M. College of Pharmacy organizes M. Pharm. Awareness Program (July 18<sup>th</sup>, 2010, Sunday)

## About the Institute

L. M. College of Pharmacy, established in 1947, is the oldest Pharmacy institute in the country. Accredited 'A' grade by the NAAC, it has been pioneer in providing quality pharmacists globally. Institute has been bestowed with all core pharmaceutical departments with all required modern infrastructure. Our mission is to create awareness about recent advances in the field of new drug discovery and development. Our faculty is globally recognized for their innovative scientific contributions in applied and basic research. The college library has rich collection of books and journals.

## Who Should Attend

Prospective students who have appeared in their Final B. Pharm. exam willing to pursue their postgraduation in India or abroad.

## Program description

It is commonly seen that an M. Pharm. student realizes pros and cons of the specialization branch once he/she enters the branch. The program is principally aimed at creating awareness about potential, niches and opportunities regarding each specific branch offered in Pharmacy. We believe that following are the key issues one has to look at before the selection of M. Pharm. branch:

- ✚ Syllabus of M. Pharm. specialization
- ✚ Different types of projects, which can be pursued in M. Pharm.
- ✚ Academic and industrial scope of the projects
- ✚ Job potential
- ✚ Higher studies potential

Aspiring candidates would receive in depth knowledge of all the fronts of their area of interest. We strongly feel that this innovative step would surely be a stepping-stone for your successful career.

## Program Structure

The program is mainly divided in three core parts:

### 1. Presentation:

The session would involve a comprehensive presentation regarding the overview of different branches, scopes and opportunities to explore in research and development in the respective branches along with key insights into different job opportunities in virtually every field of the respective branches.

### 2. One-to-One counseling:

This session was highly appreciated in our previous efforts of creating awareness to 12<sup>th</sup> pass-out students for B. Pharmacy.

The session would focus on one-to-one interaction of the candidate with our strong LMCP Alumni and invited volunteers. Scientists from key positions in several R&D departments in industries as well as top-most academicians would be participating in one-to-one counseling. They would guide you regarding the structure of M.Pharm., potential for higher studies and job opportunities with a global touch. Your every query would be addressed with utmost justification.

### 3. Poster Session

The poster session would highlight following features:

- ✚ Detailed syllabus of various M.Pharm. specialization branches
- ✚ Job opportunities after M. Pharm.
- ✚ Higher studies options and ways to explore them
- ✚ Insights on key research areas in various fields
