GUJARAT TECHNOLOGICAL UNIVERSITY

BE - SEMESTER-VI • EXAMINATION - SUMMER • 2014

	•	Code: 162903 Date: 23-05-2014 Name: Physical Testing	
Ti	•	0:30 am - 01:00 pm Total Marks: 70	
111		Attempt all questions.	
Q.1	(a)	With sketches explain various ways in which samples from fabric are to be taken	05
	(b)	for testing. Explain in detail comb sorter technique for fiber length measurement. How effective length is determined?	09
Q.2	(a)	What is fibrograph and how it is analysed? What do following terms mean?	07
	(b)	(i) Span Length (ii) UR% (iii) UI% (iv) Floating fiber % Establish relationship between fiber fineness and maturity. Discuss the principle of fineness measurement by air flow method. OR	07
	(b)	Explain the principle of fiber fineness measurement by Vibroscope. Modify the equation incorporating young's modulus.	07
Q.3	(a)	Derive mathematically the concept of twist factor for direct system. Explain twist to break method for twist measurement.	07
	(b)	With sketch explain beesley's instrument for count measurement from fabric sample.	07
		OR	
Q.3	(a) (b)	With neat sketch explain fabric stiffness measurement by cantilever principle. How bending length, flexural rigidity and bending modulus are derived? Write a short note on crease recovery test.	07 07
0.4		·	
Q.4	(a)	Discuss mathematically the effect of following on tensile strength test: (i) Test specimen length (ii) rate of loading & time to break	07
	(b)	Write briefly on any one fiber strength tester based on balance principle. OR	07
Q.4	(a)	Write in short on following terms: (i) Short, medium and long term irregularities (ii) Index of irregularity (iii) Limit irregularity	06
	(b)	What is called V-L curve? Write in short on the same.	08
Q.5	(a) (b)	Write in detail on high speed tensile strength testing instrument. Explain only the principle of transducer based strain gauge instrument for CRE tester.	08 06
0.5		OR	ο -
Q.5	(a)	What is meant by addition of irregularity and effect of doubling? Calculate drawn sliver CV% on a draw frame from following data. Undrawn Sliver CV%: 2.2, Draw Frame CV%: 3.9	06
	(b)	Write features of any one modern electronic evenness measurement instrument.	08
