Subject Code: 173201

GUJARAT TECHNOLOGICAL UNIVERSITY

BE - SEMESTER-VII • EXAMINATION - SUMMER • 2014

Date: 22-05-2014

Subject Name: Microwave and Satellite Communication Time: 02:30 pm - 05:00 pm **Total Marks: 70 Instructions:** 1. Attempt all questions. Make suitable assumptions wherever necessary. 3. Figures to the right indicate full marks. **Q.1** (a) Explain three laws of Kepler's for planetary motion. 07 (b) Explain the operation of E-plane Tee junction. Derive the scattering matrix for 07 E-plane Tee. **Q.2** (a) (i) List out various applications and advantages of microwaves. 07 (ii) Explain one of the applications of E-H plane Tee. Determine the cut off wavelength for the dominant mode in a rectangular 07 waveguide of breadth 10 cm. For a 2.5 GHz signal propagated in this waveguide in the dominant mode, find λ_g , V_g , and V_p . (b) A rectangular wave guide has dimensions 2.5 x 5 cm. Determine the guide **07** wavelength, phase constant β and phase velocity Vp at a wavelength of 4.5 cm for the dominant mode. 07 Define the following terms. 0.3 (a) (1) Phase velocity (2) Group velocity (3) Guide wavelength (4) Dominant mode. (b) How are waveguides different from normal two wire transmission lines? 07 Discuss the similarities and dissimilarities. **Q.3** Prove that it is impossible to construct matched lossless, reciprocal three port 07 (a) iunction. **(b)** Explain the working of TWT. 07 **Q.4** Discuss the application of PIN diode. 07 (a) Explain different scanning techniques for RADAR. 07 **(b)** OR Explain the basic principles of a RADAR system. Give the applications and 0.4 07 limitations of RADARs. Military RADAR operates at 5 GHz with 2.5 MW power output. If the antenna 07 diameter is 5 m, the receiver bandwidth is 1.6 MHz and has a 12 dB noise figure, what is the maximum detection range for 1 m² target. Explain need of Telemetry, Tracking, command and monitoring system in 07 **Q.5** (a) satellite communication. The earth rotates once per sidereal day of 23h 56 min 4.09s. Calculate the 07 radius of GEO satellite in Km. OR (a) Derive wave equation for a TE wave and obtain all the field components in a **Q.5** 07 rectangular waveguide. (b) Explain the need of microwave tubes as compare to conventional tubes at **07** microwave frequencies. *****
