GUJARAT TECHNOLOGICAL UNIVERSITY

BE - SEMESTER- IV(NEW) EXAMINATION - SUMMER 2015

Subject code: 2140907 Subject Name: Applied Thermal and Hydraulic Engineering		Date: 26/05/2015		
	struc 1. 2.	0:30am-1.00pm ctions: Attempt all questions. Make suitable assumptions wherever necessary. Figures to the right indicate full marks.	Total Marks: 70	U
Q.1	(a) (b)	Explain the Rankine cycle with line diagram? Also plot T-s and Explain the working of a simple air cooling system used for airc	•	07 07
Q.2	(a)	pressure ratio in cycle at 5. Calculate the cycle efficiency. If it is heated in th combustion chamber to maximum temperature of 710^{0} C. Take $\gamma = 1.4$ and $C_{p^{-1}}$		07
	(b)	1.005 kJ/kg. Describe the simple vapour compression refrigeration system vdiagram.	with T-s and P-h	07
		OR		
	(b)	Derive expressions for temperature distribution, under one dir state heat conduction for the slab.	nensional steady	07
Q.3	(a)	convection.		07
	(b)			07
Q.3	(a)	Parallel flow heat exchanger and counter flow heat exchanger.		07
	(b)	What is black body? Explain kirchhoff's law in detail.		07
Q.4	(a)	Explain the following terms: (i) Viscosity (ii) Capillary tube (iii) Surface tension		07
	(b)	What is Euler's equation of motion? Derive Euler's momentum OR	equation.	07
Q.4	(a) (b)	What is Manometer? Explain bourdon tube pressure gauge with a neat sketch. Explain the principle of venturimeter with neat sketch? Derive an expression for the discharge for the rate of flow of fluid through it.		07 07
Q.5	(a)	Obtain an expression for the work done by the impeller of a con water per second per unit weight of water.	centrifugal pump	07
	(b)	Explain cavitation in detail. OR		07
Q.5	(a) (b)	With a neat sketch, explain the working principle of a Pelton what A jet strikes the buckets of a pelton wheel, which is having shak kW. The diameter of jet is 200 mm. If the net head on the turbit the overall efficiency of the turbine. Take $C_v = 1.0$.	ft power as 7000	07 07
