GUJARAT TECHNOLOGICAL UNIVERSITY BE - SEMESTER-V • EXAMINATION – WINTER 2013

BE - SEMESTER-V • EXAMINATION – WINTER 2013			
Subject Code: 151002 Date: 04-12-20		Code: 151002 Date: 04-12-2013	
Subject Name: Engineering Electromagnetics			
	Time: 10.30 am - 01.00 pm Total Marks: 70		
Instructions:			
	1.		
	2.	Make suitable assumptions wherever necessary.	
	3.	Figures to the right indicate full marks.	~ -
Q.1	(a)	(i) Transform the vector $\mathbf{B} = y\mathbf{a}_x - x\mathbf{a}_y + z\mathbf{a}_z$ into cylindrical coordinates.	07
	(b)	(ii) Transform vector field $\mathbf{G} = (xz/y)\mathbf{a}_x$ into spherical components and variables. Derive the expression for the electric field \mathbf{E} due to infinite sheet of charge	07
	(0)	betwee the expression for the electric field E due to infinite sheet of charge having a uniform density of $\rho_s C/m^2$.	07
~ •			~ -
Q.2	(a)	State and derive following: (1) Marrow IV's first a matting for all structure to the company the same the same the same structure of	07
	(b)	 (1) Maxwell's first equation for electrostatics, Write a detailed note on potential gradient. (2) Divergence theorem. OR 	07
	(b) (b)	Derive the expression of curl. Also mention its physical interpretation.	07 07
Q.3	(a)	What are the characteristics of a good conductor? Determine boundary	07
	(b)	conditions at a boundary between a conductor and free space. A slab of dielectric material has a relative dielectric constant of 3.8 and contains	07
	(0)	a uniform electric flux density of 8 nC/m ² . If the material is lossless, find: (a) E ;	07
		(b) P; (c) the average number of dipoles per cubic meter if the average dipole	
		moment is 10^{-29} C•m.	
		OR	
Q.3	(a)	Derive the expression of following capacitors: (a) coaxial capacitor, (b) spherical	07
		capacitor, (c) isolated spherical capacitor, (d) parallel-plate capacitor having two dielectrics parallel to the plates.	
	(b)	Given the electric flux density, $\mathbf{D} = 0.3r^2 \mathbf{a}_r \text{ nC/m}^2$ in free space: (a) find E at	07
	(0)	point $P(r = 2, \theta = 25^{\circ}, \varphi = 90^{\circ})$; (b) find the total charge within the sphere	07
		r = 3; (c) find the total electric flux leaving the sphere $r = 4$.	
Q.4	(a)	State and Explain Biot-Savart law. Derive an expression of magnetic field	07
V 11	(u)	intensity for an infinitely long straight filament carrying a direct current I on the z	07
		axis from $-\infty < z < \infty$.	
	(b)	Write a detailed note on Magnetization and permeability.	07
.		OR	~-
Q.4	(a)	A current filament carrying 15 A in the \mathbf{a}_z direction lies along the entire z axis.	07
	(b)	Find H in rectangular coordinates at $P_A(20^{1/2}, 0, 4)$. Explain Hall voltage and Hall effect and mention its uses. Also derive the	07
	(0)	equation for the force on a differential current element.	07
0.5		-	07
Q.5	(a)	Mention all four Maxwell's equations for steady fields. Using the concept of Faraday's law and displacement current modify them for time varying fields.	07
	(b)	The electric field amplitude of a uniform plane wave propagating in the \mathbf{a}_z	07
		direction is 250 V/m. If $\mathbf{E} = E_x \mathbf{a}_x$ and $w = 1.00$ Mrad/s, find: (a) the frequency;	
		(b) the wavelength; (c) the period; (d) the amplitude of H .	
		OR	
Q.5	(a)	Given the potential field, $V = 2x^2y - 5z$, and a point $P(-4, 3, 6)$, find following	07
		values at point P : the potential V , the electric field intensity \mathbf{E} , the direction of \mathbf{E} ,	
	(b)	the electric flux density D , and the volume charge density ρ_{ν} . Write a detailed note on skin affect and skin denth	07

(b) Write a detailed note on skin effect and skin depth.
