		GUJARAT TECHNOLOGICAL UNIVERSITY	
	Ç.,bi	BE - SEMESTER-III • EXAMINATION – WINTER • 2014 ect Code: 131904 Date: 01-01-2015	
	•		
	•	ect Name: Materials Science and Metallurgy e: 02.30 pm - 05.00 pm Total Marks: 70	
		e: 02.30 pm - 05.00 pm Total Marks: 70 ctions:	
	IIISU u	1. Attempt all questions.	
		2. Make suitable assumptions wherever necessary.	
		3. Figures to the right indicate full marks.	
Q.1	(a)	State the importance of study of "Material Science" and briefly explain "Engineering Requirements" of materials.	05
	<b>(b)</b>	Define the following properties: (1) Toughness (2) Creep (3) Fatigue (4) Ductility	04
	<b>(c)</b>	What is Gibb's phase rule? Explain its importance.	05
Q.2	(a)	With Neat Sketch Draw Iron-Carbon(Fe-C) Equilibrium Diagram & Explain briefly	<b>07</b>
	<i>-</i> .	various microconstituents of the Diagram.	
	<b>(b)</b>	State different types of corrosion and explain their probable causes of Occurance.	07
		Enlist common methods to protect corrosion.  OR	
	<b>(b)</b>	What is metallography? What useful information can be obtained from it?	07
Q.3	(a)	What is powder metallurgy? Describe steps involved in powder metallurgy with	07
	(a)	each steps controlling properties of final sintered component.	07
	<b>(b)</b>	Describe with neat sketch how would you carry out a Jominy hardenability test on a steel sample.	07
		OR	
<b>Q.3</b>	(a)	Draw TTT diagram for eutectoid steel. Explain briefly by cooling few cooling	05
	<i>-</i> .	rates.	
	<b>(b)</b>	- ·	04
0.4	(c)	Explain properties and application Wrought iron?	05
Q.4	(a)	What is the purpose of heat treatment? Differentiate Annealing and Normalizing on the basis of: (I) Rate of cooling (II) Microstructure after cooling (III) Grain	07
		size distribution (IV) Internal Stresses (V) Mechanical properties (VI) Application	
	<b>(b)</b>	Which are the Surface Hardening processes? With net sketch Explain any one of	07
	` /	them in detail.	
		OR	
Q.4	(a)	What is non destructive test? List various non destructive tests. Explain X-Ray Radiography.	07
	<b>(b)</b>	State the advantages and limitations of Powder Metallurgy.	04

Differentiate between Edge dislocation and screw dislocation. (c) 03 Q.5 Enlist the properties of pure Aluminum and mention the composition, specific (a) properties and application of any one aluminum alloys Explain Various Ultrasonic Testing Methods of inspection with reference to its 07 **(b)** working Principle, Advantages, Limitations & Application.

**Q.5** (a) Classify Brasses based on the composition of zinc ? Explain properties & **07** Application of the main type of Brasses. (1) Differentiate between Austempering & Martempering. 04 **(b)** 

(2) Write following alloys giving their important constituents & Application: (I) Monel (II) Invar (III) Nichrome 03
