GUJARAT TECHNOLOGICAL UNIVERSITY Diploma Engineering - SEMESTER-VII • EXAMINATION – SUMMER • 2014			
Subject Code: 372304 Date:18/06 Subject Name: Blow and Thermoforming Mould Design			
Ti	•	0:30 am – 1:00 pm Total Marks: 70	
		Attempt all questions. Make suitable assumptions wherever necessary. Figures to the right indicate full marks.	
Q.1	(a)	Design and draw plan and sectional elevation of extrusion blow mould assembly for a shampoo bottle. Draw product drawing also. Assume suitable dimensions of product.	14
Q.2	(a)	Explain design consideration for vent and vacuum holes in thermoforming mould.	07
	(b)	Write various types of blow mould materials along with their characteristics. OR	07
	(b)	Describe significance of mould cooling and explain various mould cooling methods for blow mould.	07
Q.3	(a) (b)	Explain in brief about pinch-off section of blow mould design. State various properties required for thermoforming mould material. OR	07 07
Q.3	(a) (b)	Explain in brief about blow ratio and swell ratio Write short note on 'Surface treatment in thermoform mould'.	07 07
Q.4		Assuming suitable dimensions of any plastic disposable product, determine no. of impressions which can be accommodated in a female thermoform mould. Also draw plan and sectional elevation of this mould. Data: size of drape table= 500×500 mm2, height of drape table= 75 mm, sheet thickness= 1 mm	14
		OR	
Q. 4	(a) (b)	Write short note on parison stick construction for injection blow mould. Explain about shrinkage in thermoforming and its effect on draft/taper in thermoform mould design.	07 07
Q.5	(a)	Discuss design considerations for selection of parting line in blow mould design.	07
	(b)	Explain any one type of extruder die head used for parison forming. OR	07
Q.5	(a) (b)	Discuss about venting needed in blow mould design with neat sketch. Write short note on preform mould construction for injection blow	07 07
