 - **(b)** What are the role and functions of the International 07 Monetary Fund (IMF)?
- **Q.5** MK Industries is a trading firm, imports large quantity of 14

04

polymers in India. To facilitate these transactions, MK Industries takes help of various banking channels and instruments in accordance with international guidelines and laws. A typical transaction involves

- 1. Negotiating price with counterpart
- 2. Obtaining Pro-forma invoice
- **3**. Preparing Letter of Credit Application based on proforma invoice
- 4. Submitting the application to bank, which inturn gives promissory notes to corresponding bank
- 5. Prepare Application to release the document from Bank along with mandatory government forms such as Form A1 or 15c or 15d.
- 6. In addition, it may also involve filling up another application for Buyers Credit.

In all the process involves at least 6 set of different forms and documents which are interlinked with each other.

For small number of transactions, one can easily make these documents either by hand or in some word processor. Once the number of transaction increases, it becomes really difficult to handle and keep track of various documents generated. Also as the number of documents increase, so will the human error rate. Especially when document are interlinked. Also almost 80% of the information is carried forward the next document in workflow chain, hence typing these documents manually involved lot of repetitive work which costs lots of time. In such case how to tackle these issues.

OR
