Q.5		Case Study	14			
		Can Dell regain its market leader position from HP? In 2006 however, Dell faced several problems. Many customers complained about long delays in supplies. Recall of Sony battery cells in its laptops brought undesirable media hype to the company. Increasing discontent of customers led to a slowdown in sales. Consequently, Dell lost its market leadership to Hewlett-Packard Co. (HP). Industry analysts felt that, with Dell's competitors also improving their supply chains and matching Dell's direct model, the company had been losing its competitive edge. Dell will				

07

have to bear additional costs with its foray into retail distribution thereby minimizing its cost advantage. Besides, profit margins of Dell will drop further since it will have to offer incentives to compete with HP in retail stores. Though Dell spruced up its product design and range but Apple is clearly far ahead of it. Many experts feel that such new initiatives will only distract Dell from its supply chain operations.

- Examine and analyze Dell's Direct model, its basic working, success and future challenges
- Typical Working of Dell's Supply Chain and future supply chain challenges
- Highlights Dell's evolving Supply Chain practices and strategy and steps being taken by it to recapture its lost market leader position

Q.5 Case Study

Indian Railways has a common pool of marketing officers who service all its clients, and it wants to explore the idea of creating a few industry verticals within marketing. It wants to create specific industry verticals only for those industries that will have significant business potential.

- Identifying a few strategic industries where Indian Railways has high business potential, suggest a methodology that can help the railways in identifying the right industry verticals.
- Will a firm like FedEx target similar verticals or should they look for a different set of verticals? Suggest two industries that will be good from FedEx's point of view.
