## **GUJARAT TECHNOLOGICAL UNIVERSITY** MCA - SEMESTER- III • EXAMINATION - WINTER - 2016

	•	t Code:3630002 Date:30/12/20 t Name: Basic Computer Science- I (Applications of Data Structure	
	tructio	and Applications of SQL) 0.30 AM TO 01.00 PM Total Marks: ons: Attempt all questions.	70
	2. 3.	Make suitable assumptions wherever necessary.	
Q.1	(a)	<ul> <li>Do as directed: <ol> <li>Define Data structure.</li> <li>Compare Stack and Queue.</li> <li>State advantages of decision table over flowchart.</li> <li>Name two sorting methods having average execution time O(N<sup>2</sup>).</li> <li>State applications of stack.</li> <li>State best and worst case time analysis for linear search algorithm.</li> <li>Convert following infix expression into prefix expression. (A-B)/(C*D)+E</li> </ol> </li> </ul>	07
	(b)	<ol> <li>Write a note on importance of time analysis. Discuss time requirement for the algorithm to compute sum of N numbers.</li> <li>Write an algorithm to convert un- parenthesized infix expression to postfix expression.</li> </ol>	03 04
Q.2	<b>(a)</b>	Define recursion. What care should be taken in writing recursive functions? Give a recursive solution for the problem of Towers of Hanoi.	07
	(b)	<ol> <li>Write a short note on circular queue.</li> <li>Write an algorithm for PUSH and POP operations on Stack.</li> <li>OR</li> </ol>	03 04
	(b)	Define Queue. Write an algorithm to perform Insertion and Deletion operation on Queue. State applications of Queue.	07
Q.3	<b>(a)</b>	State advantages of linked lists over arrays. Write an algorithm to insert a node	07
	(b)	<ul> <li>into an ordered linked list.</li> <li>What is sorting? State any four sorting techniques. Write an algorithm to perform Selection sort. Trace the algorithm for following input values (to arrange them in ascending order).</li> <li>42 23 74 11 65 58 94 36 99 87 OR</li> </ul>	07
Q.3	<b>(a)</b>	Write a detailed note on applications of linked list. Explain any one application	07
	(b)	with example. Write an algorithm for Binary Search. Discuss time analysis for Binary Search algorithm and trace it for following sample table to search the value 275. 75 151 203 275 318 489 524 591 647 727	07
Q.4	<b>(a)</b>	Write a note on Database Life Cycle.	07
	<b>(b</b> )	<ol> <li>Write a note on rules for SQL</li> <li>Describe features of SQL</li> </ol>	03
		2. Describe features of SQL OR	04
Q.4	(a)	Explain Logical Design, Conceptual Design and Physical Design.	07

**Q.4** (a) Explain Logical Design, Conceptual Design and Physical Design.

1

(b)	<ol> <li>Explain the ALTER commands with its purpose, syntax and example.</li> <li>What are the ways of filtering table data?</li> </ol>	03 04
Q.5 (a) (b)	<ul> <li>Define View. Explain readable and updatable view with suitable example.</li> <li>1. Explain following functions.</li> <li>COUNT(*), ABS(), LTRIM()</li> </ul>	07 03
	2. Write a note on Synonym <b>OR</b>	04
Q.5 (a) (b)	<ul> <li>Write a note on different types of Join.</li> <li>1. Elaborate the concept of Sub query.</li> <li>2. Write a SQL Statement for the following Customer Schema (Cust_Id, Cust_Name, Contact_No, City) <ol> <li>Display Customers name in descending order</li> <li>Add Date of birth field to Customer's schema</li> <li>List all Customer's Name starts with 'H'</li> <li>Delete all rows with Name starting with 'A'</li> </ol> </li> </ul>	07 03 04
