GUJARAT TECHNOLOGICAL UNIVERSITY

ME - SEMESTER- I • EXAMINATION - SUMMER 2017

		ject Code: 2714106 Date: 09/05/2017	
	Tim	ject Name: Digital Modulation and Coding e: 2:30 PM to 5:00 PM actions: 1. Attempt all questions. 2. Make suitable assumptions wherever necessary.	
		3. Figures to the right indicate full marks.	
Q.1	(a) (b)	With a suitable example, explain encoding and decoding of (6, 3) linear block code. Describe standard array decoding for the linear block codes with a suitable (6, 3) code example.	07 07
Q.2	(a)	For a (6,3) systematic linear block code, three parity check digits are V3= u0+u1+u2 V4= u0+u1 V5= u0+u2, Where u0, u1 and u2 are message digits. Then construct the appropriate generator matrix and code table. With corresponding decoding table, decode the data word if	07
	(b)	received word is: 101100. Describe C.P.M with full and partial response. Also discuss about phase tree and signal space diagram of binary C.P.F.S.K.	07
	(b)	OR Discuss MPSK modulation in detail and derive the energy and Euclidean distance for the modulated signal. Also explain the signal space diagram for $M=2,4,8$.	07
Q.3	(a) (b)	Describe burst error correcting code in detail. Explain MFSK signal constellation diagrams for orthogonal and bi-orthogonal signals. OR	07 07
Q.3	(a) (b)	Describe Reed Solomon code. Discuss interleaved codes in detail.	07 07
Q.4	(a)	Compare convolution codes with linear block codes and explain encoding of rate R= ½ non systematic feed forward convolution encoder.	07
	(b)	Draw convolution encoder $(2,1,3)$ for generator matrix $G(D) = [1+D+D^2+D^3]$ and hence obtain state table, code tree and trellis diagram for the same.	07
Q.4	(a)	Discuss fundamental ideas behind turbo codes and hence explain basic turbo encoding	07
	(b)	structure. Draw convolution encoder $(2,1,2)$ for generator matrix $G(D) = [1+D 1+D+D^2]$ and hence obtain state table, code tree and trellis diagram for the same.	07
Q.5	(a)	State the advantages of LDPC codes over turbo codes and describe basic formation of LDPC codes based on Gallager's idea.	07
	(b)	Write a short note on BCH codes.	07
Q.5	(a) (b)	OR Explain encoding and decoding of systematic (7,4) cyclic code with suitable example. Compare FDMA & TDMA and briefly explain fundamentals of CDMA.	07 07
