GUJARAT TECHNOLOGICAL UNIVERSITY PDDC - SEMESTER-VI • EXAMINATION – WINTER 2013

Subj	ect	Code: X60901 Date: 04-12-2013	3
Time	Subject Name: Electrical Machine - III Fime: 02.30 pm - 05.00 pm Total Marks: 70 nstructions:		0
mstru	1. 2.		
Q.1	(a)	of synchronous motor	07
	(b)	List different methods for finding voltage regulation of an alternator and explain Potier method.	07
Q.2	(a)	a q	07
	(b)	Draw circuit diagram What are the causes of harmonics in the voltage waveform of an alternator? How can these be minimized?	07
		OR	
	(b)	Explain an experimental method of determining 'V' curves for a synchronous motor.	07
Q.3	(a)	Draw experimental setup diagram of Brake test for DC motor and write its efficiency equation	07
	(b)	Explain Hopkinson's test on a pair of D.C.Machines. OR	07
Q.3	(a)	Explain the effect of varying the excitation and torque of the prime-mover of	07
	(b)	synchronous machine connected to infinite bus-bar. State the condition and explain dark lamp method of synchronizing of an alternator with busbar.	07
Q.4	(a)	How these values change with harmonics. Also explain how e.m.f. in alternator	07
	(b)	can be evaluated when it contains non sinusoidal variation of fluxes. Explain the principles of operation of DC servo motor and PM synchronous motor.	07
		OR	
Q.4 Q.4	(a) (b)		07 07
Q.5	(a)	Explain concept of "Two reaction theory" used for the analysis of a salient pole synchronous machine.	07
	(b)		07
Q.5	(a)	What do you mean by 'Synchronous reactance' in syn. Machine? Explain why the synchronous impedance method gives a regulation that is higher than the	07
	(b)	actual value in case of syn. Generator List different methods for finding voltage regulation of an alternator and explain ZPF method.	07
