Guidelines for Evaluation of Projects (For External Examiners)

In order to justify the attempts of the B.E. Semester 7th students for their first ever attempt to implement IDP at GTU, the external examiners are requested to refer to the following guidelines for evaluation of Project – 1.

- *Students are to be evaluated for their innovative ideas, and not for size of the project.*
- *Basic understanding of the student for the Project and related methodologies for its implementation need to be analyzed, using your expertise.*
- *In case of students, who have fully implemented their project in B.E. Sem.7, they are to be given another project in the Sem. 8. Please discuss with such students the future scope of update/modifications to current project, which may be taken up in Sem. 8, if possible.*
- *If project is has not been fully implemented, you are requested to provide inputs for their future implementations and the availability of various sources to help the students during implementation.*
- *If students have not reached to a significant level in the project, then please analyze the causes for the same and please report to the University in this feedback form for Project – 1.*
