GUJARAT TECHNOLOGICAL UNIVERSITY

2nd Floor, ACPC Building,
L. D. College of Engineering Campus,
Navrangpura, Ahmedabad,
(Gujarat) India - 380015.

Date : 30th January, 2012

To,
The Principal / HR Manager.

Subject : A National Conference on "Advances in Drug Delivery Technologies" on 24th - 25th March 2012, organized by Gujarat Technological University.

Respected Sir / Madam,

Gujarat Technological University is pleased to announce the organization of a National Conference on '*Advances in Drug delivery Technologies*' on 24th and 25th March, 2012 with **Organization of Pharmaceutical Unity with BioAllied Sciences (OPUBS) and Journal of Pharmacy & BioAllied Sciences (JPBS)** as publication partners. The Conference is supported by **Baroda College of Pharmacy and Parul Institute of Pharmacy**.

During the last few years, researchers have been actively working on targeted drug delivery by studying the applications of emerging technologies like supercritical fluid technology, nanotechnology, polymeric systems, magnetically assisted drug delivery technology, iontophoresis, sonophoresis etc. These drug delivery technologies have helped make the therapies cost effective and more efficient. This National Conference is being organized with an objective to bring researchers, faculty members and students together on a common platform with developers of such drugs in the industries.

In this conference, plenary lectures will be delivered by researchers and academics of repute and by experts from pharmaceutical industries. They will discuss the frontier technologies, developed and used for efficient and targeted delivery of drugs. This National Conference will also provide a platform for young pharmacy researchers to present their contributions in the area of development of new drug delivery systems.

Gujarat Technological University urges all the faculty members and post-graduate students of pharmacy to actively participate in the conference. We invite all the researchers in this field to present their work at the conference. The developers and researchers in the field of targeted drug delivery and working in industries are highly welcome. Jointly we can make this Conference a first rate platform for mutually beneficial inter-action.

While the selected papers will be published in the special issue of JPBS, we are also exploring the possibilities of making the papers available on GTU's web-site.

Looking forward to your active participation.

Dr. Akshai Aggarwal
Vice Chancellor
