It is required to develop the natural potentials of their students and to build their personality to deal with the challenges of the constantly fast changing world. To succeed today's global competitive environment technical skills are must. But the technical skills are not sufficient to progress in one's career.

CDC has organized a one day national seminar on personality development program for the students of institutions affiliated to Gujarat Technological University on 13<sup>th</sup> April, 2013. This seminar is oriented towards students as "employable graduates" from "ordinary students". The expectation is that the Seminar will induce all the Colleges and the UDISHA Clubs to take steps to organize well-designed Personality Development Programs.

In fact, personality implies something unique that an individual has. His or her characteristic makes him or her outstanding and leads one stand out in a crowd. The program endeavors to achieve following goals:

- Improving communication and leadership skills
- Developing pre-employment skills
- Inculcating body language especially during interview
