WORKSHOP
ON
LINUX OPERATING SYSTEM

Organized on
16th July, 2013, Saturday (03:00 TO 5:00 PM)

Grow More Faculty of Engineering has established GTU Open Source Technologies Club(OSTC) under which we had organized workshop on open source technology “Linux Operating System”. The workshop was conducted with the help of IIT Bombay Spoken Tutorial Team. Around 20 faculty member participated in this workshop.

- ❖ The purpose of this workshop is to spread awareness about open source technology by providing complete information about Linux Operating System. Participants from different departments get benefited from this workshop.
- ❖ In the current world of license soft ware’s, workshop on open source Linux server training was information-packed of Linux training filled with hands-on exercises, live demonstrations, explanations, and real-world examples.
- ❖ This is the perfect way to learn Linux operating system and open source software in quickly. In just two hours, the videos has been prepared by experienced, professional Linux+ certified trainer of IIT Bombay, will show you how to use a complete Linux system from basic usage to more advanced topics including web services, mail services, and other network services. From this workshop we learn the hidden commands used by Linux and Unix pros to run their systems at top performance.
- ❖ We have seen the best ways to monitor and optimize systems. We learn how to customize the Linux logging facility to provide exactly the information we need

OPEN SOURCE TECHNOLOGIES CLUB (OSTC)

to fine tune and troubleshoot our Linux system. We learn how to integrate Linux systems and how to use desktop services for users as well as how to share resources in a Linux network by extending the file system from one machine to another.

- ❖ For anyone who's wanted to learn Linux, but just doesn't have the time, these 2-hours, hands-on Linux workshop is perfect solution for them.
- ❖ We are thankful to GTU and IITB spoken tutorial team for Open Source Technologies Club initiative.
