Student Start ups can take advantage of the below program

Hiranmay Mahanta receives an invitation from Chile, inviting our Startups.

Start-Up Chile is a program created by the Chilean Government that seeks to attract early-phase, high-potential entrepreneurs to bootstrap their startups using Chile as a platform to go global. The program offers its participants a global network in order to achieve this. Join Start-Up Chile's meetups around the world and get ready to apply to a network of +800 startups from 65 plus countries! Receive equity-free seed funding and build your global business from Chile, the booming entrepreneurial hub of Lat Am.

During the six months the participants must establish themselves in Chile, for which they receive a 1-year work visa and USD \$40k (nearly 25 lac INR) . The objective, besides developing their startups, is to create and foster networks with the local entrepreneurship ecosystem. The end goal is to position Chile as the innovation and entrepreneurship hub of Latin America and it is believed said goal can be achieved by connecting entrepreneurs, linking them together with dynamic and diverse networks.

The program, unique in the world, is the ideal opportunity for bootstrappers to receive funding without ceding equity while utilizing one of the strongest Latin American economies as their launching/development platform.

Start-Up Chile's 10th application process is going to be open from **4th March to 25th March**. and expect to receive more entrepreneurs from India and from all over the world.

For more information about the Start-Up Chile experience, please visit www.startupchile.org.
