

Model & Poster Exhibition, 2014 at SAL Technical Campus

Models & Poster exhibition is a great way to engage the visitors and will help the students to think of new ways to explain their research so that non expert audiences can understand. Posters can be used as stand-alone methods to raise awareness or they can be used to draw an audience in and encourage them to talk to or take part in a demonstration. SAL Technical Campus organized Model & Poster Exhibition, 2014 on 2nd May, 2014 for Final year students, who exhibited their innovative projects to the industry professionals, academicians & parents. The exhibition was inaugurated by the Director of SAL Technical Campus Dr. Rupesh Vasani with the team of HOD's , Industry professionals & Academicians of various colleges. All the final year students with the help of faculties of respective departments had arranged the posters with the live models in the exhibition. Students were given platform to demonstrate their projects and were analyzed by the jury members consisting industry professionals and academicians from several colleges. The jury members were the expert professionals from the companies like ISRO, J P Research Ltd, Automation Engineers, Mark Engineers, Cube Construction Engineering Ltd, Virtual Heights and so on. It also includes expert HOD's from several colleges. Parents appreciated the hard work of students. Best three projects of each department were acknowledged with a token of appreciation and acknowledgement by the principal and HOD's of the respective department. The juries announced the winners on the basis of the innovation, the presentation etc.

The live projects were shown by the students which was very informative for industry professionals. **J P Research India Ltd** evaluated 8 mechanical final year students & selected them for the job in their company. Three HR representative - one from Ahmadabad office and two from Chennai office of the company- specially visited the exhibition to screen the projects of the students. Eight students from Mechanical Branch have been selected by the company and have been offered the job as Trainees in J P Research India Ltd.

Mr Himanshu Jaiswal , Director of Virtual Heights offered jobs to a few students of Computer Engineering Department on PHP, . NET and Android.

We would like to thank all our participants including students, Faculties, Placements cell, HOD's, industry experts and academicians to make this event a huge success. Especially we would thank Gujarat Technological University for bringing this innovative idea of conducting the poster exhibition which gives the students the platform to showcase their innovation, creativity, talent and job.

Feedbacks from some few experts from Industries:

“ We like the innovative approach of the students who had done the hard work and would like to hire from the group of students in our company. ”

-- **Murtuza Painter**, The Crash Investigator from J P Research India Ltd

“ We are very excited and happy to see the innovations done by the students of SAL Institutes and especially the innovations like Eco Friendly car, potable spot welding machine, Automobile ventilation system and so on . “

--- **Dharm Singh Parmar** , Director of Automation Engineers
