## Submission of the Final Year Project Report

by Students of BE 8<sup>th</sup> Semester  
**Response to Queries**

1. **Plagiarism Verification:** Through GTU circular, available at <http://www.gtu.ac.in/circulars/14Apr/GuidelinesfortheOpen.pdf>, the students were advised to use any plagiarism software, to which they might have access. However OAPS, an open source software was given as an example. It seems that OAPS site (on a US server) has been overloaded due to the use by a large number of GTU students during a short time.

**This should not be an issue since many such softwares are available on Internet.** Appendix 1 gives a list of such software. Please use any one of them (or any other plagiarism verification software, available to you.)

2. Submission of PDE forms: PDE forms were to be generated and submitted through a gtuinnovationcouncil web-site. This website has also become overloaded due to a large number of log-ins at the last moment.  
*Due to heavy traffic on this IT platform if students face challenges to generate PDE forms and acknowledgement certificate through the GIC web link, they can fill the data offline in the given PDE format and attach it to the report by taking its print out. The soft copy of the PDE forms in (.doc) file format for PDE exercise is given in Appendix 2.*

**N.B. Please note that every team must submit the data of the project and PDE online also.** However they may do it later on, when the **traffic load on the GIC web-site is reduced, even after exam is finished.** The team can generate online submission certificate when they submit, get it signed and attach to the spiral report, submitted to their Head of Department.

**Appendix 1: Some more Plagiarism Verification software:**

<http://www.plagiarismssoftware.net/>

<http://www.plagiarism-detect.com/>

A team can choose any of the above or any other Plagiarism Verification software, which they prefer.

They need to mention the % plagiarism in the certificate after fetching result from the online open source Plagiarism Verification tool.
