Center of Environment and Green Technologies
establishes

GTU – School of Glass Processing Technology

With the advent of green technology, green building concept has become very popular. Green building must minimize the demand of non-renewable resources and maximize the reuse, recycling and utilization of renewable resources. In India today most of the buildings extensively use Glazing in form of Facade Glazing or in the form of large windows. The installation and Glass processing have emerged as one of the important areas of employment in Gujarat. Gujarat is facing acute shortage of Skill required for glass façade fabrication and installation Technology.

In order to develop need based skilled manpower in the emerging sector (glass façade, fenestration and glass processing industry), the Glass Academy joined hands with Gujarat Technological University to impart glass façade & processing skills and such other skills to the Diploma/ Degree students of Civil & Mechanical Engineering in the GTU premises. These trained students will be industry responsive and readily employable in the industry.

GTU is the only University in India to commence the program in Glass Processing Technology.

Admission are open for first Bach of Glass Processing Technology program.

On 6th February 2015, an orientation program has been organized for interested Candidates from Faculty members of GTU or any other University. However the faculty members from GTU are hereby invited to attend the orientation program so that they can create awareness among their institutes.

Initially the training programme is of 12 weeks at GTU Gandhinagar campus. The detailed course content and further information will be provided at the orientation program.
