## Two Days Advanced Workshop on “Patent Search & Drafting of Patent Application” For Engineering & Pharmacy Faculties / students of GTU On 28<sup>th</sup> & 29<sup>th</sup> April, 2012

### ABOUT THE PROGRAMME

After successful completion of five different Two days Workshop of “Patenting in Engineering” at different zone of GTU along with one workshop on “Patenting in Pharmaceuticals” during September 2011 to March 2012, so far nearly **1000 faculty members** have been trained in the aspect of basics of Patents and IPR. Simultaneously awareness seminar on IPR was also conducted for engineering students wherein nearly **1000 students** sensitize at different zone for the same.

Now after undergoing this basic training, many faculty (and students) may understand that their work is also novel, non-obvious and having industrial utility, ie. invention fulfills the criteria of patentability. In this whole process to check the novelty using patent search database is very important, which can be done effectively with paid database only. Second important aspect is how to draft the patent application, if it fulfill all above 3 criteria.

Therefore GTU has taken a next step to arrange an “*Advanced workshop on Patent search and Drafting of Patent Application*”, so that such faculties and students can come with their invention and can able to do the search and drafting by their own / with help of experts. Each participating faculty / students have to sign non-disclosure agreement at the time of participation in this workshop, so that confidentiality will be secured from both the side.

### OBJECTIVES

- To give hands-on-training of Patent searching technique using paid database
- To provide hands-on-training of Patent drafting and filing procedures.
