

Internal Exam for Degree and Diploma Engg.

As per the recommendations of the academic committee and discussed in the Principal's meet following issues are required to be clarified.

- Theory paper will be of 70 marks, which will be converted to grades as per the circulation of Evaluation System.
- Mid semester exam should be of 20 marks or can be converted into 20 marks equivalent and finally clubbed in grading.
- 10 marks are kept for internal evaluation based on assignments, practical, quiz etc. When student completes practical work and/or assignment given in a satisfactory fashion, then and then only satisfactory work completion certificate can be given in the examination form by the principal. In that case the student becomes eligible for getting at least minimum passing marks (40%) in the particular head. This will also be clubbed in grading.
- Minimum passing for Mid semester test is 40%, that is 8 marks out of 20.
- Student has to clear both the component of internal evaluation with 40% minimum individually.
- In case of any subject without practical as well as tutorial, 10 marks should be from the quiz, assignments etc. or else mid semester component can be of 30 marks or equivalent conversion to 30 marks.

This is for the clarification.
